

Protect yourself and your family from natural disasters

Survival Passport

Chapter 152

Used by approx. half of neighborhood associations!

Please use the Local Disaster Response Stations!

A local disaster response station is: **1** A place for neighborhood associations* to use as a temporary base after disasters, and **2** a "disaster response base" with equipment to use for fire fighting and rescue work. **3** It is also a distribution point for relief supplies. There are local disaster response stations in 61 places within Minoh City in places like parks, and are used by 148 (approx. half of the total) neighborhood associations. We offer on-site information sessions to show you how to use the stations and the equipment stored inside, so please feel free to call the Civil Defence Division (☎ 072-724-6750).
*Neighborhood associations include apartment management associations.

1 Gather

Right after a disaster, you can meet here and gather safety check results!

Your neighborhood association uses the space as a temporary evacuation area, and gathers neighborhood safety check results. A representative then reports the results to an evacuation center.*

*Your evacuation center is your nearest Elementary School (in the case of Kita Elementary School District, it is Maple Hall. For Kayano Kita Elementary School District, it is Dai Ni Junior High School.)

2 Help others

Use the stored equipment to fight fires and help rescue others!

By using the fire fighting and rescue equipment stored inside, you can greatly shorten fire fighting and rescue times to save others, even by yourself.

3 Distribute

Use it as a base for distributing relief supplies!

In Minoh City, relief supplies are distributed by neighborhood associations. Local disaster response stations can be used as a base for distribution.

The items stored at the station

can also be used at regular neighborhood association events!

The equipment stored in the large bench can be taken out, and is all easy and safe to use! Use the equipment (tents, lanterns, handheld megaphones, etc.) regularly at neighborhood events so you know how to use them in a disaster.

▶▶ In a disaster, use your nearest local disaster response station as a base!

You just need to submit an application form to apply. Contact the Civil Defence Division (☎ 072-724-6750). 1 station can be used by multiple neighborhood associations.

Local disaster response stations are located in **61 places** around the city!

Please see the map (QR code) for details about the station locations.

For neighborhood association members that use local disaster response stations!

At least 1 time a year Please hold a disaster drill

In order to save as many lives as possible in an emergency, it is important to know how to use the fire fighting and rescue equipment stored in the stations. If you are a neighborhood association member, please run at least 1 disaster drill every year using a local disaster response station. These drills also help to check that equipment is ready to use, so we ask for your support.

If any of the stored equipment has been damaged or lost, please call the Civil Defence Division (☎ 072-724-6750).
