Protect yourself and your family from natural disasters

Chapter 175

Please use the Local Disaster Response Stations!

Inquiries: Civil Defence Division TEL 072-724-6750 FAX 072-724-6376

A local disaster response station is: ① A place for neighborhood associations to meet after a disaster and gather safety check results, and ② a "disaster response base" with equipment to use for fire fighting and rescue work. ③ It is also a distribution point for relief supplies. We offer on-site information sessions to show you how to use the stations etc, so please feel free to call the Civil Defence Division (072-724-6750). *Neighborhood associations include apartment management associations.

Local disaster response stations are located in 61 places around the city! Large benches are used to store fire fighting and rescue equipment! Tents, lanterns etc. can also be used at regular events.

In a disaster, use your nearest local disaster response station as a base!

You just need to submit an application form to apply.

Contact the Civil Defence Division (☎ 072-724-6750).

*1 station can be used by multiple neighborhood associations.

Please see the map (QR code) for details about the station locations.

Starting January, we introduced the disaster prevention app "HAZARDON (R)"!

Feature 1. Get the latest updates delivered via push notifications!

You can receive weather warnings, earthquake information, and evacuation notices within the city, via push notifications.

Feature 2. Hazard zone maps are available for checking!

You can check landslide hazard zones, flood inundation zones etc. on the app's map.

Feature 3. Multilingual broadcasting is also available!!

Map and broadcast information is available not only in Japanese but also in 13 languages.

For details on how to download the disaster prevention app, please visit the city website.
